**Billet Engine Kill/Starter Switch**

Replaces the stock engine kill switch on all off-road motorcycles except the 2009 CR450f. Integrated into the clamp that holds the clutch lever or front brake master-cylinder; this item eliminates one component completely off the motorcycle to make handlebar changes faster and easier than ever before. For those that ride electric start motorcycles, a second switch can be added to eliminate the stock start button! We recommend this application for the CRX-WRF-KLX-XR & all electric start KTMs.
